

SHAKER PACK INSTRUCTIONS

- Before opening, upend and shake the grass seed carton, as this will remix the seed that may have settled in transit. Turn the carton on its side and carefully place finger under flap and slide, along the edge to break the seal.
- Slowly walk over the area to be seeded, gently shaking the box from side to side, ensuring even distribution.
- The carton may be resealed after use, as indicated in the diagram below.

SKUDPAK INSTRUKSIES

- Voordat houer oopgemaak word, hou regop en skud sodat saad wat gedurende vervoer afgesak het, gemeng word. Draai die houer op sy kant, plaas vinger versigtig onder flap en gly langs rand om seël te breek.
- Loop stadig oor die area wat gesaai moet word en skud die houer ligges van kant tot kant, om 'n eweredige verspreiding te verseker.
- Die houer kan na gebruik herseël word, soos aangedui in onderstaande skets.

1. 12,5m²

2. Garden Phosphate 90g/m² + Lawn Fertilizer 60g/m²

3. Rake Level - Hark Gelyk

4. 500g / 12,5m²

5. Rake lightly - Hark Ligges

6. Roll Or Trample - Rol Of Trap Vas

7. Keep Moist - avoid puddles Hou Klam - vermy waterpele

8.

9. Lawn Fertilizer Grasperk Kunsmis 60g/m² - 4 x per year / jaar

Cutting Height / Sny Hoogte

PRO-LAWN
All Seasons Grass mix
This mixture is for full sun, semi-shade and full shade and remains green all year around-even when exposed to frost. It is not invasive and does not require edge trimming.

Always mow lawn in the shade at the highest possible cutting height. Minimum = 5cm

Gras in die skaduwee moet altyd teen die hoogste snylengte gesny word. Minimum = 5cm

PRO-LAWN ADVANTAGES

- Dark green colour
- Super turf quality
- Quick ground coverage
- Heat tolerant
- Stays green throughout the year
- Grows in full sun, semi-shade and full shade conditions.

Pro-Lawn All Seasons Grass Mix includes improved varieties designed specifically for your region and climate.

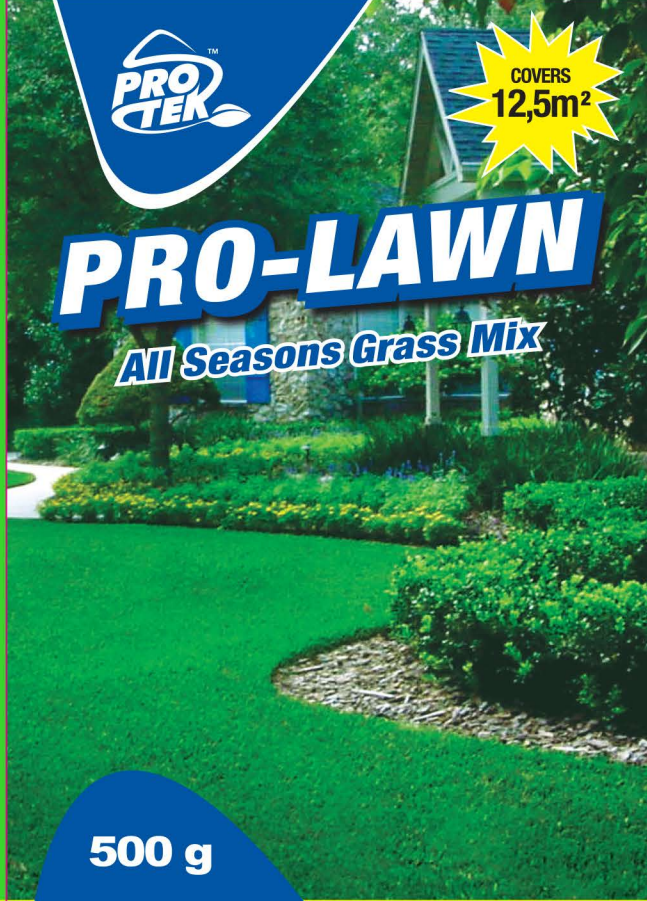

Germination can be expected 5 to 10 days after sowing and reasonable coverage in 6 to 8 weeks. This lawn takes a few months to reach full maturity.

Best times to sow are spring and autumn. Avoid very hot or very cold times of the year.
